

# MAGNILUMEN Fluorescent Retrofit Kit Installation

Working together  
to get the job done!

**STEP 1:** Turn off power and remove the lamps and ballast cover. Disconnect the incoming power from the ballast, trim the tombstone wires, and remove the ballast.

**STEP 2:** Place the Magnilumen magnetic driver into the fixture, and ground the driver.

**STEP 3:** Connect the new driver to the incoming power.

**STEP 4:** Be sure to keep your wiring neat.

**STEP 5:** Replace the ballast cover and connect the wire harness so it is accessible.

**STEP 6:** Clip Magnilumen's magnetic mounting brackets to the back of the LED boards.

**STEP 7:** Place the magnetized LED boards into the fixture.

**STEP 8:** Connect the wire harness to the LED boards.

**STEP 9:** Turn on your power to test your newly retrofitted fixture.

**STEP 10:** Apply the retrofit sticker.

**STEP 11:** Adjust the LED boards to maximize your light beam spread.

**STEP 12:** Installation is complete!
